1. Coverage scope

Institute Cargo Clauses (A) — ICC(A) all-risks basis, subject to the special commodity exclusion in §5 below.

2. Sum insured

110% of master invoice value = USD 49,500.

3. Deductible

2% of the settled claim amount, with a USD 1,000 minimum deductible per claim event (i.e., the deductible is the higher of 2% of claim or USD 1,000).

4. TPNP extension

TPND extension included.

5. SPECIAL COMMODITY EXCLUSION — Natural-Fibre Textile Moisture Damage (Clause SC-NFT-2024-Rev3)

Clause SC-NFT-2024-Rev3 (incorporated by reference into this policy on issuance):

*Notwithstanding the all-risks coverage of ICC(A), moisture damage, water damage, condensation damage, mildew, mould and any related deterioration affecting natural-fibre textile cargo (including but not limited to cotton, linen, wool, silk, hemp, jute, and blends in which a natural fibre is the predominant component by mass) is **excluded from this policy** unless the assured establishes, via a survey report from an independent surveyor of standing acceptable to the insurer, that the moisture damage was caused by **gross negligence of the carrier or master**. The surveyor's report must specifically address and finding-of-fact establish gross negligence; a finding of 'ordinary water damage in transit' is **not** sufficient to override this exclusion.*

Application to the present loss

The loss involves cotton-linen blend garments (natural-fibre predominant by mass) and the surveyor's finding-of-fact was 'ordinary water damage in transit' with explicit 'no gross negligence determined'. The exclusion's gross-negligence override condition is therefore not satisfied on the present record. This clause is a

Sinosure standard rider attached to all natural-fibre textile cargo policies issued since 2024, following an industry-wide claims experience review. It **overrides** the general ICC(A) coverage as it applies to natural-fibre textiles.

6. Notice of claim

Must be filed within 14 days of discharge at the final destination port. Within window.
