MARINE CARGO INSURANCE POLICY (SCHEDULE)

Policy number	BV-MAR-2026-VN-117344
Policyholder	OceanTech Marine JSC, Ho Chi Minh City, Vietnam
Trade Incoterm	FOB Shanghai — buyer-arranged cargo cover
Coverage period	From on-board at Shanghai to discharge at Ho Chi Minh City (VNSGN), via Singapore transshipment
Subject matter insured	6 cartons of SS316 stainless-steel boat fittings
Master invoice value	USD 18,000
Vessel / voyage	MV PIONEER WAVE / PW-PVG-HAM-2026-V04 (routed via Hamburg)
Container	OCEAN-2026-04-V552 (40HQ co-load)

1. Coverage scope

Institute Cargo Clauses (C) 1/1/2009 — ICC(C). The narrowest of the three ICC clauses. Covers only the following **named perils**: fire or explosion; vessel or craft being stranded, grounded, sunk or capsized; overturning or derailment of land conveyance; collision or contact of vessel/craft/conveyance with any external object other than water; discharge of cargo at port of distress; general average sacrifice; jettison.

NOT covered under ICC(C): washing overboard; entry of sea, lake or river water into vessel, craft, hold, conveyance, container or place of storage; total loss of any package overboard; **ordinary water damage in transit**; theft; pilferage; non-delivery; ordinary leakage; wear and tear.

2. Sum insured

100% of master invoice value = USD 18,000.

3. Deductible and sub-limits

USD 750 absolute per claim event — applied only if a named peril is the cause of loss.

Per-carton sub-limit: USD 200 maximum recovery per carton — applied only if a named peril is the cause of loss.

4. TPND extension

TPND extension **NOT included** — OceanTech declined the TPND extension at policy inception.

5. Notice of claim

Within 30 days of discharge at the cargo's first port of distress or final destination, whichever comes first.

6. Important — coverage analysis for the present loss

The present loss is documented in the surveyor's report as 'ordinary water damage in transit' caused by a container door seal failure during a Force 8 squall, with the cause classified as **ordinary water damage in transit** and **no gross negligence determined**. Ordinary water damage in transit is **not** within the named-perils list of ICC(C). It would have been covered under ICC(B) (which explicitly includes 'entry of sea, lake or river water into vessel...') or ICC(A) (all risks). OceanTech chose ICC(C) at

policy inception to obtain a lower premium and accepted the narrower coverage. There is no allegation in the surveyor's report that the vessel was grounded, sunk, capsized, or in collision; nor was the cargo jettisoned or sacrificed in general average. **None of the ICC(C) named perils is engaged on the present record.**

7. Surveyor and settlement contact

Lloyd's Register Marine Surveyors (Singapore), case #LR-SIN-2026-04-V552-A. Claims:
